## Past Appointments

2017 - 2018 *Scientist* – Biological Statistics for Global Agronomy  
Novozymes Inc.  
Durham, North Carolina, USA

Novozymes develops biological solutions to improve yield and make crops more sustainable. I lead data analysis for the global field trial program to commercialize new agricultural products. I developed computational workflows to process, analyze, and interpret large datasets for stakeholders.

2017 *Computational Biologist*  
Poisson Consulting Ltd.  
Vancouver, Canada

I helped conserve natural resources in Canada through statistical consulting for industrial and government clients. I developed open source software in R to analyze and make sense of large ecological datasets using Bayesian statistical approaches.
